

HD1220

Full HD, 12x Zoom, Wide Angle, PTZ Conference Camera

Features at a Glance

- Full HD capture - 1920x1080p
- 12x Optical Zoom
- Video outputs - DVI and SDI
- IP Streaming video output
- 72.5 degree - Wide angle viewing
- PTZ with 120+ pre-set options
- RS232/484 & IP Camera Control
- IR Remote Control
- Up-side down mounting
- Step-driven Pan/Tilt drive-train

Overview:

The HD1220 High Definition video conferencing camera is a mountable pan/tilt camera solution designed for the Education, Medical and Enterprise marketplace where installations require a superior capture solution.

The HD1220 adopts an 1/3 inch HD CMOS sensor providing video capture of 1920x1080P full HD, with integrated video outputs of DVI, SDI and IP streaming as standard, Installations can utilise all outputs simultaneously for maximum flexibility during content distribution.

The individual IP streaming output control allows operators to "set and forget" or actively adjust the IP output settings, maximising video quality for any IT network environments.

Internally the HD1220 adopts a geared step-driven pan/tilt drive-train providing responsive movements controllable via RS232/485 commands, XML (IP controls) or via the included IR remote control

Incorporating over 120 pre-set positions the HD1220 can be mounted both upside down or in a more traditional method giving maximum installation flexibility.
